Primary Care Partnerships

What we do

1 Partnerships

We build effective partnerships with the local community to improve health and wellbeing.

We do this by driving quality improvement and best practice across the system by sharing data, undertaking integrated planning, action and evaluation, workforce and resource development and community participation.

2 Addressing inequity

Our efforts focus on improving health & wellbeing for people experiencing vulnerability.

3 Areas of work

We work in system integration and prevention in the following areas:

health literacy	preventing harm from gambling
social & cultural connectedness	alcohol and other drugs
housing & homelessness	family violence
education & employment	prevention of violence against women
climate change	chronic disease
active living	community resilience
mental health & wellbeing	oral health
disability	healthy ageing
healthy eating	mobilising community will

Benefits

We have a deep understanding of the issues facing our local communities. We have demonstrated experience in bringing the right people together to work collaboratively to develop local solutions to local problems.

1

We are facilitating the local implementation of over 20 state government policies and reform agendas

Our work ensures that local outcomes align with Victorian government outcomes.

2

The impact of our partnership work is stronger local, regional and state-wide collaboration and action. This collaboration generates creativity and innovation, reduces duplication and healthcare costs.
